

*Dear Sir/Madam,*

*Thank you for your interest in our Studio Franchise powered by our 360· FIT - ShapeTech brand. I am sure you will be impressed with the opportunity we are offering, to enhance your existing business or start your new lucrative venture with our fantastic new service.*

**ShapeTech** vacuum treadmill is a proven revolutionary system for reducing the appearance of cellulite and reshaping the body. This innovative technology has been taking Europe by storm for the past 9 years.

### **360· FIT - ShapeTech is a Non-Surgical Alternative to Liposuction.**

It is currently being offered at a number of locations in the USA, Spain, Holland, France, Germany, Italy, Russia, Greece, Poland, Czech Republic, Saudi Arabia and in Turkey. It is soaring in popularity within the beauty and fitness industry. In short, it simply works and we can show you how.

## Our 360- FIT & ShapeTech Combination Works!

The problem with the current methods of losing weight in the thighs, hips, stomach or buttocks are simple: They either don't work or they don't have long term results.

Even the most dedicated gym fanatic is not happy with "saddlebags" and cellulite. No matter how hard they try, it is just too difficult to get inch loss and cellulite reduction in those problem zone areas due to natural lack of circulation..

ShapeTech works with gentle exercise and a constant vacuum suction within the chamber. The science and client history proves that this system really works. It is based on a proven concept that reduces the appearance of cellulite and burns stubborn fat whilst maintaining an optimal blood flow. A special fitting on the system creates an airtight seal around the client, and the machine applies a controlled and variable reduction in atmosphere to increase the blood flow.

### ShapeTech will Reduce Inches & Cellulite

These photos demonstrate a typical cosmetic improvement in 30 days.

You will begin seeing results within 2 weeks and they get better over the course of treatments. You will notice a visible improvement in the firmness and texture of the skin, an overall reduction and smoothing of cellulite, as well as guaranteed inch loss so that you can squeeze into that little black dress!

These are all original photos, taken on experimental clients over a period of 30 days. The ShapeTech system is for the average male or female who are looking for inch loss in their problem zone areas such as the abdomen, Hips, thighs and buttocks. These are considered as 'problematic' areas because exercise and diet alone cannot shift the stubborn fatty deposits.

Over 95% of men and women can achieve the results they are looking for with the ShapeTech, without the need for expensive and risky surgical procedures.

Safely patented, yet simple combination that gets remarkable results with minimal effort by the client. The combination of light exercise, performed in a low atmospheric pressure and regulated heat flow completed with a strict commitment to the programme, equals a successful result.

Exercising the lower section of the body only, this system stimulates with great effect the fat burning process in the problem zones. The vertical position inside the ShapeTech ensures the optimal flow of lymph. The natural elliptical movement protects the joints and body. Compared with other Vacuum fat burning programs, the results with ShapeTech will be achieved with far less effort and in a much shorter period of time.

### **360- FIT & ShapeTech is an Incredible Business Opportunity**

- Clients can lose on average 25 – 35 cm of inches with just a single course of 12 sessions per month .
- 1 SIZE SLIM DOWN IN 1 MONTH

The ShapeTech systems are very competitively priced, and the average return on the investment is significantly quicker than other beauty businesses, such as regular fitness studios and beauty salons. It is an easy sell to existing salon clients who know and trust you, and a fantastic way of getting new customers into your SHAPETECH STUDIO.

The math is simple: Everyone wants to look good and to do so with the minimum amount of time and effort. For some it is an inexpensive alternative to surgery. For others, it is an affordable and

effective method of reducing fat from the most difficult parts of their body. For the salon owner, it is a system that delivers results which in return your clients will be happy to pay for.

## **ShapeTech is easily integrated into your beauty clinic, gym or fitness studio**

ShapeTech systems require very little maintenance. We provide you with all of the training. You can easily fit two or more ShapeTech machines into the average fitness studio or into the average beauty room (you don't need individual rooms or extra air conditioning).

ShapeTech does not require certification or registration other than standard business licensing.

***ShapeTech is the easiest add-on revenue system for existing health and beauty businesses. You can promote the ShapeTech in advance with our marketing pack, book your clients in and start using your new ShapeTech system the day it arrives.***

To learn why our method is right for your business, visit our website, send us an email or call us directly for more information.

Rest assured that after your ShapeTech purchase we will provide full marketing and promotional support. Our philosophy is to introduce and train you in a working business environment so that you will walk away with confidence in the success of your new ShapeTech venture.

**The ShapeTech Vacuumtreadmill is manufactured and assembled in Turkey. We are proud to announce that we are the only company in the industry complying with the official ISO9001 and CE certificates**
